Response to Arguments

1. Applicant's arguments filed 4/16/2007 have been considered but are moot in view of the new ground(s) of rejection.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-87 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1, 21, 41, and 59, in part, recite "...a TV ride lineup specifying a predetermined sequence of TV programming for automatically tuning, **without user input**...to multiple different channels in sequence during a window of time". Applicant indicates in the remarks that support for the claim amendment may be found in the specification at pages 9-11, 14-16, and at figure 4. In fact, the most relevant portions of the disclosure describe "TV rides provide a viewer with a number of predetermined TV programming lineups that may be presented by automatically tuning the viewer's set top box 20 to the channels corresponding to the TV programming lineup associated with the TV ride...After creating a lineup, the viewer's set top box 20 automatically tunes to the selected TV programming...The TV ride lineup and the lineup data are processed to automatically tune to the source of TV programming indicated by the channel and time indicated by the TV ride line up (step 440)..." (Specification: p. 9, lines 24-27; p. 14, lines 14-15; p. 15, lines 6-8). However, the specification does not specifically disclose the limitation "...automatically tuning, **without user input**..." as claimed. Therefore, claims 1, 21, 41, 59 and

Art Unit: 2623

their corresponding dependent claims 2-20, 22-40, 42-58 and 60-87 are rejected as failing to comply with the written description requirement.

4. Claims 1-87 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 1 and 21, in part, recite "...automatically tuning, **without user input...**" and "...receiving **from a user** to whom the list is presented a **TV ride selection** from among the list of TV rides presented". Claims 41 and 59, in part, recite "...automatically tuning, **without user input** and in response to the client system receiving the **TV ride selection from the user...**" It is noted that the claimed feature of selection TV ride from the user encompasses user input. Therefore, this feature and "...automatically tuning, without user input" are contradictory.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Houghton et al. (US 6,757,707 B1) discloses displaying related sources of viewing content in a web-based TV system. Ching et al (US 7,222,354 B1) discloses a system for presenting multimedia program that is customized to a specific audience.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 2623

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
